MECHANISM (B)
diffusion teacher (VLB)
consistency / adversarial
distillation
one- or few-step student
diffusion
no teacher: path regression
direct few-step training
(MeanFlow, IMM)
few-step sampler
diffusion
diffusion model: discrete-chain VLB
probability-flow evaluation
trace estimator + ODE solve / datum
likelihood of the ODE model
diffusion
VQ-VAE encoder–decoder (VAE)
prior over codes (AR)
composition
system label = sampling family
VQ-VAE: exact over the codes
bound once decoded to pixels
AR (sampling)
WaveNet teacher (AR)
Parallel WaveNet:
probability density distillation
IAF student: one sequential
pass / dim on external data
AR → flow
contrast: A stays
