MODEL $\mathbf{s}_{\boldsymbol{\theta}}(\mathbf{x}, \sigma_i)$
sample
SAMPLER annealed Langevin dynamics: $\mathbf{x} \leftarrow \mathbf{x} + \frac{\kappa_i}{2}\mathbf{s}_{\boldsymbol{\theta}}(\mathbf{x}, \sigma_i) + \sqrt{\kappa_i}\,\boldsymbol{\varepsilon}$, $\kappa_i \propto \sigma_i^2$, for $i = 1, \ldots, L$
